Academic Honesty and Plagiarism

Plagiarism is using the words or ideas of others and presenting them as your own. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement.

UNSW groups plagiarism into the following categories.

Copying: using the same or very similar words to the original text or idea without acknowledging the source or using quotation marks. This also applies to images, art and design processes, as well as presentations where someone presents another's ideas or words as their own.

Inappropriate paraphrasing: Changing a few words and phrases while mostly retaining the original structure and/or progression of ideas of the original, and information without acknowledgement. This also applies in presentations where someone paraphrases another's ideas or words without crediting them, and to piecing together quotes and paraphrases into a new work, such as reproducing them yourself.

Collusion: working with others but passing off the work as your own individual work. Collusion also includes providing your work to another student before the due date, or for the purpose of them using it for their own advantage, or for the purposes of the same
