SCHOOL OF PSYCHOLOGY

PSYC2001

RESEARCH METHODS 2

SEMESTER 1, 2016

Table of Contents

1. Information about the Course	2
2. Staff Involved in the Course	2
3. Course Timetable	2
4. Aims of the Course	3
5. Student Learning Outcomes	3
6.	

Critical thinking skills	3	Lectures will raise theoretical issues regarding how to quantify and communicate probabilistic information.
Values, research and professional ethics	2	All components of the course will emphasise how to draw valid conclusions from evidence
Communication skills	2	Throughout the course, emphasis will be given to communication of the outcomes of inferential analyses. The mid-semester test and final exam will assess these skills.
Learning and application of psychology	1	Lecture material, tutorial exercises and assignment will include reference to examples of applied research.

This course prepares students for higher-level psychology courses by conveying the benefits and limitations of particular research designs and inferential statistical analyses. It also provides specific

Course Schedule

Expected Resources for Students	
TEXTBOOK	<p>There is no set textbook for this course. You may wish to consult the following books held in the / L E U High Use Collection, but they are not required reading for the course.</p> <p>Howell, D. C. (2012). <i>Statistical Methods for Psychology</i>. Belmont, CA : Thomson/Wadsworth.</p> <p>Smithson, M. (2000). <i>Statistics with Confidence</i>. London: Sage.</p>
TUTORIAL MANUAL	<p>Download the Tutorial Manual from Moodle and print at start of semester.</p> <p>The manual includes material to be covered in statistics and computing labs, practice questions, and statistical tables.</p>

Course Evaluation & Development

Plagiarism & Academic Integrity

What is plagiarism?

3 O D J L D U L V P L V S U H V H Q W L Q J V R P H A R Q U H W R O I V d a ¶ t a k e W h a t Y o u k e y W o r k s F r o m F
 not having appropriate academic referencing to deliberate cheating.

UNSW groups plagiarism into the following categories:

- x **Copying:** using the same or very similar words to the original text or idea without acknowledging the source or using quotation marks. This also applies to images, art and design projects, as well
 D V S U H V H Q W D W L R Q V Z K H U H V R P H R Q H S U H V H Q W V D Q R W K H

x **What is Turnitin?**

Turnitin is a checking database which reviews your work and compares it to an international collection of books, journals, Internet pages and other student work. Turnitin checks referencing and whether you have copied something from another student, resource, or off the Internet. Sometimes students submit their work into Turnitin when they hand it in, but academics can also use it to check a student's work. For more about Turnitin here: <https://teaching.unsw.edu.au/elearning>.

What if plagiarism is found in my work?

If plagiarism is found in your work when you are in first year, your lecturer will offer you assistance to improve your academic skills. They may ask you to look at some online resources, attend the Learning Centre, or sometimes resubmit your work with the problem fixed. However more serious cases may be investigated under the Student Misconduct Procedures.

Repeated plagiarism (even in first year), plagiarism after first year, or serious instances, may also be investigated under the Student Misconduct Procedures. The penalties under the procedures can include a reduction in marks, failing a course or for the most serious matters (like plagiarism in an Honours thesis) suspension from the university. The Student Misconduct Procedures are available here: <https://www.gs.unsw.edu.au/policy/documents/studentmisconductprocedures.pdf>

Examples of plagiarism

Using the internet inappropriately

A first year student handed in an assignment where she had copied from a website, Her lecturer and journal articles. The lecturer explained how to reference and sent her to a workshop at the Learning Centre to help her improve her skills.

Working together on a math assignment

A group of Mathematics students worked together on an assignment when they had been told this was not allowed. All questions where the students had worked together were given zero, and this led to some student failing the assessment.
