

# Record Security Guideline

Version	Approved by	Approval date
		21 Feb 2015

The use of \_\_\_\_\_, \_\_\_\_\_ and \_\_\_\_\_ can be provided on request, though is generally not recommended due to the additional administrative complexity their application can impart.

\_\_\_\_\_ and \_\_\_\_\_ govern access to the informational content of the record and are required for the other permissions to be available. For example, a document must be retrievable (View Metadata) to \_\_\_\_\_
