Lectures	In lectures you will be introduced to new material, shown demonstrations and examples of how to solve problems. You will then make use of this to solve relevant problems. You can choose between four online asynchronous (web stream) lectures each week or four hours of synchronous online lectures.
OTH classes	You enrol in either a two-hour face-to-face session that takes place most weeks or a one-hour online session. In these sessions, you will practice solving problems and have the opportunity

	<p>four questions in each quiz, based on the lecture material covered the previous week.</p> <p>You will also have quizzes during weeks 7 and 10 pulled from this same question bank.</p>

-------------------------	--------------	---------------	---------------------------	--

	<p>Describe different heat transfer mechanisms and calculate the amount of heat transferred in different processes.</p> <p>Identify physical systems that can be understood using models of simple harmonic oscillation and write down equations to describe this motion.</p> <p>Write down and solve equations describing wave motion, and use these equations to explain physical phenomena such as (but not limited to) standing waves and interference.</p> <p>Recognise that physics is an experimental science, plan and conduct experiments and analyse the outcomes, and include reliable estimates of uncertainties in measurements.</p>
<p>Relationship of the Course in the Program</p>	<p>PHYS1121 is a pre requisite for PHYS1221, Physics 1B. Students need to score at least 65 in PHYS1121 to enroll in PHYS1231, Higher Physics 1B. Due to SY grading this terms flexibility will be shown with this requirement. If you do need PHYS1231 you should enroll in PHYS1131.</p>

## 11. Academic integrity, referencing and plagiarism

academic integrity is fundamental to success at university. Academic integrity can be defined as a commitment to six fundamental values in academic pursuits.

For a full list of the six values, please visit [www.utoronto.ca/academic-integrity](#)

*Academic integrity is fundamental to success at university. Academic integrity can be defined as a commitment to six fundamental values in academic pursuits:*
