

including case discussions. The teaching strategies of PSYC7210 are designed to encourage you to think and act as professional interns. Material covering important theoretical and practical knowledge covered in lectures will be exemplified using actual case material from the lecturers' clinical work including test profiles and videoed material where available. Students will be provided with reference lists and "study questions" to help focus reading. Case discussions will provide class members the opportunity to practice integrating lecture-based information in order to "diagnose" neuropsychological disorders in hypothetical case studies. The oral group presentation is provided as an opportunity to think through a specific case study from neuroanatomy, neuropathology and neuropsychology through to issues of remediation.

While lectures will focus upon the basic elements of neuropsychology, the topic is a broad one and the study guide and reference lists provide the opportunity for in-depth study. It is expected that students will independently read on each topic discussed in class. In addition, students are encouraged to prepare for case studies and the "evidence-based" projects in small groups, in order to hone skills in test interpretation and critical consideration of treatment approaches. All the tests discussed are available in the Test Library and students are encouraged to familiarise themselves with these as they come up in class. This is a unique opportunity to develop this knowledge base, because few professional settings will offer as expansive a resource in tests as does the UNSW Test Library. Finally, the material presented in this course will be of direct relevance when conducting a cognitive assessment for clients referred in the Clinic. Lecture notes and references should be utilised heavily when taking on such clients.

Attendance and participation in all aspects of the lectures and workshops on Monday and Tuesday 10-12pm each week is compulsory to ensure students are consistently working towards achieving the foundational graduate competencies required by the APAC Accreditation Standards. These Accreditation Standards are incorporated in Program and Course Learning Outcomes. All news updates and announcements will be made on the 'Announcements' forum on the Moodle page and/or by email. It is the student's responsibility to check Moodle and their student emails regularly to keep up to date.

There is no single book that adequately covers Clinical Neuropsychology as taught in this program. Each week, references to books, chapters and papers that provide excellent overviews will be provided.

For your reference the following textbooks provide overviews of the knowledge base of clinical neuropsychology and topics that will be covered:

Upon your enrolment at UNSW, you share responsibility with us for maintaining a safe, harmonious and tolerant University environment.

You are required to:

- Comply with the University's conditions of enrolment.
- Act responsibly, ethically, safely and with integrity.
- Observe standards of equity and respect in dealing with every member of the UNSW community.
- Engage in lawful behaviour.
- Use and care for University resources in a responsible and appropriate manner.
- Maintain the University's reputation and good standing.

For more information, visit the [UNSW Student Code of Conduct Website](#).

- The [Use of AI for assessments](#) site.

The Student Conduct and Integrity Unit provides further resources to assist you to understand your conduct obligations as a student: <https://student.unsw.edu.au/conduct>

UNSW has a standard late submission penalty of:

UNSW has a standard late submission penalty of:

UNSW has a standard late submission penalty of:

- 5% per day,
- for all assessments where a penalty applies,
- capped at five days (120 hours) from the assessment deadline, after which a student cannot submit an assessment, and
- no permitted variation.

**Any variations to the above will be explicitly stated in the Course Outline or Assessment Instructions**

Students are expected to manage their time to meet deadlines and to request extensions as early as possible before the deadline.

If circumstances prevent you from attending/completing an assessment task, you must officially apply for special consideration, usually within 3 days of the sitting date/due date. You can apply by logging onto myUNSW and following the link in the My Student Profile Tab. Medical documentation or other documentation explaining your absence must be submitted with your application. Once your application has been assessed, you will be contacted via your student email address to be advised of the official outcome and any actions that need to be taken from there. For more information about special consideration, please visit: <https://student.unsw.edu.au/special-consideration>

UNSW has a "fit to sit/submit" rule, which means that if you sit an exam or submit a piece of assessment, you are declaring yourself fit to do so and cannot later apply for Special Consideration. This is to ensure that if you feel unwell or are faced with significant circumstances beyond your control that affect your ability to study, you do not sit an examination or submit an assessment that does not reflect your best performance. Instead, you should apply for Special Consideration as soon as you realise you are not well enough or are otherwise unable to sit or submit an assessment.
