2. Course information

Units of credit: 6

Pre-requisite(s): Program Pre- UHTXLVLWH %DFKHORUUV'HJL (Australian Qualification standard or equivalent). PSYC5001 and PSYC5002 (or equivalent with advanced standing), PSYC5003 and PSYC5004

2.1 Course summary

This course introduces students to those areas of psychology that are more closely concerned with cognitive processes. The course are perceptual organisation, perception of spatial layout, perceptual learning, object recognition, memory storage and retrieval, decision making, and language. The practical program will provide an introduction to the use of psychophysical methods, experimental approaches to the study of cognitive processes, and the application of findings in society.

2.2 Course aims

This course aims to introduce students to the perceptual and cognitive processes that underlie human behaviour such as perceptual organisation, perception and spatial perception and spatial learning.

4. Develop an understanding of the values, research and professional ethics of psychology, with a focus on perception and cognition enabling you to promote evidence-based approaches to understanding and changing human

2.4 Relationship between course and program learning outcomes and assessments

Program Learning Outcomes							
CLO	1. Knowledge	2. Research Methods	3. Critical Thinking Skills	4. Values and Ethics	5. Communication, Interpersonal and Teamwork	6. Application	Assessment
